## Pushpin and ScrollFire:

<p>Scrollable content that pushes the previous content away, GREAT</p> 	<p>Scrollfire launches callback functions depending on how far into the page the user has scrolled !!!</p>
---	--

## Scrollspy and SideNav

As the page scrolls a mini navigation follows the currently displayed sub-content (usually on the right side of a page):

- Introduction
- Structure**
- Initialization
- Options

### Side Nav:

The screenshot shows a dark-themed sidebar titled "Side Nav". It includes a user profile picture, the name "John Doe", and the email "johndoe@gmail.com". Below this are three menu items: "First Link With Icon" (with a cloud icon), "Second Link" (with a gear icon), and "Third Link With Waves" (with a wave icon). At the bottom of the sidebar is a button labeled "SIDE NAV DEMO". To the right of the sidebar, the main content area has a header "Introduction" and a section titled "HTML Structure" with some sample code. On the far right, there's a "slack" logo and a sidebar with links like "Structure", "Initialization", "Plugin Options", "Methods", "Variations", and a language selector "English".

## Tabs:
